

CESSNA CITATION X ELITE

CITATION X ELITE PROGRAM

The Citation X Elite program provides a unique and exceptional value to our customers using Citation X's coming out of the NetJets fleet.

Under a partnership with our major vendors, these Citation X's are brought back to the Wichita Citation Service Center where they undergo a comprehensive refurbishment process that includes aileron re-gearing, Honeywell Elite displays, dual LaserRefs, upgraded FMS, a totally new interior with new style IPECO passenger seats and an updated cabin management system, to name a few.

When complete, these Citation X Elite aircraft are essentially in new condition and with the 1,500 hour / five-year guaranteed rates for parts, maintenance and engines, this aircraft is an exceptional value.

Details of the Citation X Elite program are as follows:

AILERON REGEARING

To enhance lateral control efficiency during approach in gusty, or crosswind conditions. Aileron control system will require less control wheel input to obtain a given amount of roll response.

AVIONICS

Honeywell Primus Elite Upgrade

The new Primus Elite system includes new DU875 LCD display units that will allow the addition of Jeppesen Electronic Charts and Maps, Geo-referenced aircraft positioning and XM graphical weather (with SB750-34-56). The system will also be capable of supporting future growth opportunities including ADS-B, RNP approaches, video display capabilities and synthetic vision.

XM Graphical Weather Upgrade

XM graphical weather to be displayed in the cockpit on the MFD's.

AH800 to Laseref IV Modification

The AH800 was replaced with Laseref IV.

FMS 6.1

Software update with the addition of WAAS/LPV capability (pending certification).

ADS-B Out

The foundation of Next-Gen technology. The ability of the aircraft to transmit its own position to air-traffic control gives a much more precise location of the aircraft rather than radar [pending certification].

CESSNA CITATION X ELITE

CITATION X ELITE PROGRAM (Continued)

PAINT

New exterior paint with Cor-Ban Treatment.

INTERIOR

Completely refurbished interior including new IPECO passenger seats and Goodrich crew seats.

PHONE & INTERNET

Aircell Axxess– a multi-channel global voice and narrowband data system.

ATG4000

Add-on for the Aircell Axxess cabin system, adding seamless high-speed internet to airborne communications in the continental U.S. and portions of Alaska.

CABIN MANAGEMENT SYSTEM

The entire cabin management system is replaced with up-to-date, modern electronics offered by Mid Continent Controls. A touch screen will be incorporated at the Galley and VIP location.

Switch Panel Replacement and Upgrade

Removes all IFE system components from the aircraft and only replaces existing switch panels and control modules for cabin comfort features such as lights, shades, cabin temp, galley, and vanity functions.

Flight Information Display

The flight information display will show basic flight information on a new, color vibrant display.

Monitor Receptacle

USB chargers are installed in side ledges.
